DEEPBUILD HACKATHON 2026 / PARTICIPANT GUIDE

JUDGING CRITERIA & HACKATHON RULES

A simple guide to how teams are evaluated, what is expected, and how to present.

100
POINTS - Total score

5
CRITERIA - Evaluation areas

3 MIN
Per-team presentation

01 SCORING CRITERIA

Judges award points directly in each category. All five scores add up to 100 points.

CRITERION	MAX	WHAT JUDGES LOOK FOR
Idea / Problem	**25**	Is the problem real and clearly defined, relevant to real users, with a strong proposed solution?
Scalability / Innovation	**25**	Is the approach original, and can the solution grow beyond a prototype?
AI Integration	**25**	Is Generative AI used meaningfully and well, adding real value to the product?
UI / User Experience	**15**	Visual design, ease of use, responsiveness and overall polish.
Clear Presentation	**10**	Clear structure, a live demo that works, and helpful answers to questions.
TOTAL	**100**	**Direct scoring. No rating conversion required.**

02 HACKATHON RULES

01 Build on-site
Ideas, planning and research are fine beforehand. The submitted solution must be built during the event.

02 Open to all backgrounds
Technical and non-technical teams are equally welcome. AI, no-code and conventional tools are allowed.

03 A working MVP is enough
A functional app, website, workflow or prototype is sufficient. Production readiness is not expected.

04 Use Generative AI meaningfully
AI should add real value to your product, not be added for show. AI accounts for 25 points.

05 Show what you built
Demonstrate core functionality and explain your approach, decisions and use of tools.

06 Solve a real problem
Your project must address a genuine problem for real users.

07 Respect the clock
Your team has exactly three minutes, including the live demo and judges' questions.

03 YOUR 3-MINUTE PRESENTATION

2 MIN

Explanation & live demo

Explain the problem, who faces it and your solution, then show what you built and how AI is used.

1 MIN

Judges' Q&A

Answer questions about your solution and approach.

04 JUDGING AND RESULTS

Final scores	Each judge scores out of 100. A team's final score is the average of its judges' scores.
Tie-breakers	Idea / Problem > Scalability / Innovation > AI Integration.
